

PLEASE STOP AND ASK BEFORE YOU CLICK

Patient and staff privacy are extremely important to us. Please don't take pictures or videos of CHOP staff or other patients and families without their permission.

- We understand many families want to capture their child's CHOP journey by taking photos or videos.

- Everyone's privacy is important.

- Always make sure you don't accidentally include another patient or family in your photo or video.

- Some CHOP care providers prefer not to be photographed while working. You can ask them to take a photo of your child once they are done providing care.

- Always ask if it is OK before taking pictures or videos that include a staff member or another patient or family.

Thank you for partnering with us!
