

Thank you for your participation in the CHOP Biobank! This bi-annual newsletter is meant to keep you updated on CHOP Biobank activities and how the Biobank is enabling breakthroughs at CHOP.

Earlier this month, the CHOP Research Institute held its annual Research Symposium. The CHOP Research Symposium offers CHOP researchers an opportunity to share their work and innovation with colleagues from across the institute. The CHOP Biobank participated by hosting a booth to educate the CHOP research community about the CHOP Biobank and how this resource is built to advance and accelerate pediatric discoveries.

The CHOP Biobank has reached a new milestone! Early in May, the Biobank consented its 1000th participant! The CHOP community is grateful to all the participants, and we look forward to sharing more milestones with you.

All CHOP patients are eligible to participate! Please share the Biobank webpage, [CHOP Biobank: Making Breakthroughs Together | Children's Hospital of Philadelphia](#) with other CHOP families who may be interested.

You may withdraw from the CHOP Biobank at any time. Please contact the Study Team at biobank@chop.edu or 267-426-7755.
