

KETONE RULES: CHECK, INJECT, DRINK

CHECK blood sugar and ketones every 2 hours.

INJECT fast-acting insulin every 2 hours.

- Use correction dose if on basal/bolus insulin.
- Use ketone dose ____ units if you don't have a correction dose.

DRINK your age in ounces of fluid each hour.

- If blood sugar is more than 240 mg/dL, drink water.
- If blood sugar is less than 240 mg/dL, drink juice.

PUMPERS

When blood sugars are high with ketones,

CHANGE INFUSION

SET and give insulin

by injection

NOT THE PUMP!

This cycle of **CHECK, INJECT** and **DRINK** continues until urine is clear of ketones.

If 2 correction/ketone doses have not cleared ketones:

CALL EMERGENCY NUMBER

daytime: 215-590-3174

evenings and weekends:

215-590-1000
